

Friction can be reduced by changing from?

Friction can be reduced by changing from which of the following?

A. Sliding to rolling

B. Rolling to sliding

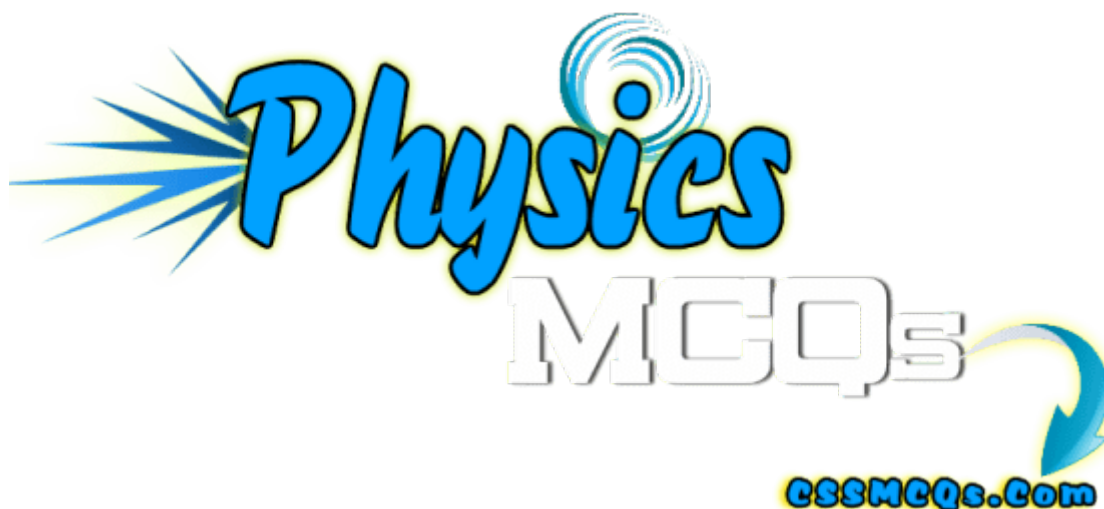

C. Dynamic to Static

D. Walking to Running

Friction

Friction is a force which opposes the motion of an object. It is always **easier** to **roll** than to **slide** an object over another object. Therefore, **rolling** friction is much less than **sliding** friction.

Physics MCQs

Physics MCQs by CSSMCQs

[MCQs of Physics by CSS MCQs](#)

Here, you will find all [Physics subject MCQs](#) with their Answers. These Chapter Wise Physics MCQs would help you in entry test preparation For FPSC, PPSC, KPPSC, SPSC, NTS, PTS, OTS, CTS, MDCAT, ECAT, ETEA, NUMS and all other entry tests preparation.

These Physics MCQs will help you get better marks in every kind of job or university admission test. Our focus will be on the fundamental level of the Physics course. However, advanced level Physics MCQs will also be shared with their correct answers.

Furthermore, You can also [Submit Physics MCQs](#). And If, you are willing to take [Online Quiz](#), Click [HERE](#)
