

According to Digital Census-2023, what is the Growth Rate in Pakistan?

According to Digital Census-2023, what is the Growth Rate in Pakistan?

Growth Rate: 2.55%

Growth Rate: 1.75%

Growth Rate: 3.85%

Growth Rate: 4.20%

Show Answer...

**Correct Answer: Growth Rate: 2.55%**

## According to Digital Census-2023, what is the Growth Rate in Pakistan?

**A. Growth Rate: 2.55%**

B. Growth Rate: 1.75%

C. Growth Rate: 3.85%

D. Growth Rate: 4.20%

### Introduction

The Digital Census-2023 in Pakistan has provided valuable insights into the country's population dynamics and demographic trends. One of the key indicators assessed through this census is the growth rate, which offers important information about the rate at which the population is increasing.

### Growth Rate: 2.55%

The Growth Rate reported by the Digital Census-2023 for Pakistan is **2.55%**. This figure reflects the percentage increase in the population over a specific period, often calculated annually. The growth rate is a significant metric as it helps policymakers, researchers, and planners make informed decisions regarding various sectors, including healthcare, education, and urban planning.

### Understanding the Significance

A growth rate of 2.55% indicates a moderate increase in the population of Pakistan. This information has implications for resource allocation, infrastructure

According to Digital Census-2023, what is the Growth Rate in Pakistan?

development, and social services. It guides policymakers in addressing challenges related to urbanization, employment, and sustainability.

## Factors Influencing Growth Rate

Several factors contribute to the growth rate of a population. These may include birth rates, death rates, immigration, and emigration. A balanced understanding of these factors enables a comprehensive analysis of the growth rate and its impact on the nation.

## Planning for the Future

The data obtained from the Digital Census-2023, including the growth rate, serves as a foundation for future planning and development. It aids in projecting future population sizes, identifying trends, and formulating strategies to ensure sustainable growth.

The growth rate of 2.55% reported in the Digital Census-2023 offers a valuable snapshot of Pakistan's population dynamics. This information plays a crucial role in guiding policymakers, researchers, and institutions as they work towards addressing the evolving needs of the nation. By leveraging accurate demographic data, Pakistan can strive for a more prosperous and sustainable future.

**According to Digital Census-2023, the total population of Pakistan is 241.59 million.**

The results of the Digital Census-2023 have revealed that the total population of Pakistan has reached a significant milestone, standing at **241.59 million** individuals. This comprehensive census, conducted using advanced digital methodologies, provides an accurate and up-to-date representation of the nation's demographic landscape. The census process was overseen by the **Pakistan Bureau of Statistics (PBS)** and received approval from the Council of Common Interest (CCI), signifying its importance in shaping evidence-based policies and development strategies.

According to Digital Census-2023, what is the Growth Rate in Pakistan?

## ***Population of Pakistan Soars to 241.49 Million in Historic Digital Census***

The [Council of Common Interest \(CCI\)](#) proudly declares the culmination of Pakistan's **First Ever Digital Census**, marking a transformative milestone in the country's demographic assessment. With unanimous agreement achieved during its 50th session convened under the esteemed leadership of Prime Minister Muhammad Shahbaz Sharif, the CCI ratifies the results of this groundbreaking census. Esteemed Chief Ministers from all Provinces graced the occasion with their presence, signifying the nationwide importance of this achievement.

Embarking on its journey on **1st March 2023**, the **7th Population and Housing Census** seamlessly harnessed the capabilities of digital technology to comprehensively quantify the populace of Pakistan. This historic endeavour unveils an impressive count of **241.49 million** individuals residing within the country's borders. This significant achievement is indicative of a steady growth rate of **2.55%**, a testament to the nation's evolving demographic landscape, as meticulously reported by the Pakistan Bureau of Statistics (PBS).

### **Key Statistics at a Glance:**

- Total Population: **241.49 million**
- Growth Rate: **2.55%**
- Census Initiation Date: **1st March, 2023**

- **Population 2017:** 24,832,634
- **Growth Rate:** 3.17%

#### 7. Balochistan:

- **All:**
  - **Households:** 2,318,519
  - **Population 2023:** 14,894,402
  - **Average Household Size:** 6.42
  - **Population 2017:** 12,335,129
  - **Growth Rate:** 3.20%
- **Rural:**
  - **Households:** 1,664,015
  - **Population 2023:** 10,282,574
  - **Average Household Size:** 6.18
  - **Population 2017:** 8,928,428
  - **Growth Rate:** 2.39%
- **Urban:**
  - **Households:** 654,504
  - **Population 2023:** 4,611,828
  - **Average Household Size:** 7.05
  - **Population 2017:** 3,406,701
  - **Growth Rate:** 5.19%

#### 8. Islamabad Capital Territory:

- **All:**
  - **Households:** 411,518
  - **Population 2023:** 2,363,863
  - **Average Household Size:** 5.74
  - **Population 2017:** 2,003,368
  - **Growth Rate:** 2.80%
- **Rural:**
  - **Households:** 226,244
  - **Population 2023:** 1,254,991
  - **Average Household Size:** 5.55

- **Population 2017:** 994,365
- **Growth Rate:** 3.97%
- **Urban:**
  - **Households:** 185,274
  - **Population 2023:** 1,108,872
  - **Average Household Size:** 5.99
  - **Population 2017:** 1,009,003
  - **Growth Rate:** 1.59%

## Significance of the Population Count

Accurate population data is crucial for effective governance, resource allocation, and policy formulation. The Digital Census-2023's precise count of **241.59 million** individuals equips policymakers, researchers, and institutions with the insights needed to address various challenges and opportunities that arise from the country's demographic diversity.

**Press Release | Total Population of Pakistan According to the 7th Digital Census-2023**

## **Announcement of Results of 7th Population and Housing Census-2023 ‘The Digital Census’**

**Final Results (Click to download official data):**

**Pakistan | Balochistan | Khyber Pakhtunkhwa | Punjab | Sindh | For more visit [PBS Official site...](#)**

Council of Common Interest (CCI) in its 45th Meeting held on 12th April 2021 decided to approve the final results of 6th Population & Housing Census-2017 in the larger national interest and also decided that **“the process of next census should start as early as possible according to international best practices by using latest technology”**.

2. Owing to the Importance of Census and its long term ramifications due to its linkage with Political Representation & Resource Allocation, and in order to bring credibility & transparency to the whole Census & to adopt best International Practices, Government of Pakistan constituted Census Advisory Committee(CAC) of renowned Demographers & Experts from all Provinces under the Chair of Deputy Chairman Planning Commission(DCPC) with extensive Terms of Reference for 7th Population & Housing Census (Digital Census). The Committee held series of meetings and reviewed the Census-2017 processes in detail to identify issues along with comparative studies of the countries of region & globe to adopt best international practices. The CAC after detail study of process, UN principles and deliberations recommended to conduct the 7th Population & Housing Census, **“Digitally”** through tablets linked with **Geographic Information System** (GIS) for real time monitoring. The committee also observed that the one of the major issue was **“trust deficit”** therefore in order to bring transparency, credibility and ownership to whole census processes, Provinces must be involved from start to end i.e. from planning to compilation of census results.

3. Keeping in view the above mentioned facts and in order to bring credibility & broader acceptability to the gigantic process of 7th Population & Housing Census in **the world’s fifth big country**, extensive working was initiated. In the first step, series of consultative meetings were held with Provinces for generating consensus and as confidence building measure. **Afterwards, the same recommendations were approved by CCI in its 49th Meeting held on 13January 2022 with the decision to conduct 7th Population & Housing Census “Digitally” in the shortest Span of 18th months.** Accordingly, in order to conduct the gigantic exercise of Paramount importance in challenging timelines, PBS worked on Government to Government Model (G2G) by involving different National Organizations, NADRA( provision of 126000 tablets , Census ERP and field technical support), NTC ( Data infrastructure (Storage & Computing Facilities)), SUPARCO( Provision of high resolution imagery for geotagging & complete coverage), Provincial Governments (121000

enumerators, monitoring & conduct of census) and Armed Forces (provision of security to Field staff).

4. The Process **largest exercise in South Asia and Pakistan's first-ever digital census**, has garnered global praise and promoted a **softer image** for the country due to prudent architecture, design and flawless execution of the **First-Ever Digital Census, marking it as a historic milestone**, and establishing a remarkable impact on the technology footprint of the country. The gigantic exercise was efficiently & successfully managed with coordination & support of all stakeholders. For provision of the reliable data for the policy & planning for evidence-based decision-making, the data for development of frame for economic census was also integrated with the housing and population census, saving the government Rs. 7 Billion. This will help to conduct the first ever economic census in the country for provision of evidence for economic planning

5. The technological leaps achieved during the census through a unique, **indigenous, self-enumeration portal** (first in South Asia, which has given softer image to the country). The specially user friendly designed data collection software with builtin edit checks and role based customized dashboards; fully IT trained, **121000 enumerators equipped with tablets linked with GIS through high resolution imagery, geo-tagged 40 million structures** (including all type economic establishments like schools, colleges, mosques hostels et.), integration of digitization in a sophisticated way, which resulted in **seamless data synchronization of over 250 million data to servers**. Dedicated 24/7 Call centers for complaint management and problem resolution along with SMS gateway are the other prominent features of Digital census. For the first time in history of country, **customized dashboard linked with GIS was provided to the provinces during conduct of census which not only provided the live population statistics but help to monitor the progress, identify the issues for timely rectification**. This process not only brought transparency but also provided credibility and ownership to whole census process.

6. The data collected through digital census will provide the basis for planning for economic growth, inequity reduction, and improved service delivery and governance. Plans are developed to use the GIS data for strengthening postal/courier services, merchandise delivery, and gig economy. Moreover, plans are being developed to engage with Telco, infopreneurs, sourcing, supply chains,

and financial sector for strengthening existing business and creating opportunities for economic growth and jobs. This data will provide customized dashboards with geotagged structures linked with different socio economic data like literacy, housing, employment, migration etc. for different sectors like **“Education”, “Health”, and Housing** and help planning commission of Pakistan for need based projects designed for each sector on preferred criteria. The socio-economic data collected through Census with geotagged structures is the tool for development and will be used as lubricant for **“Paradigm shift”** for planning based on informed decision making for efficient management, effective Governance and resource allocation.

1. The efficient and state of the art designed process for collecting census data across the country; with real-time monitoring using GIS systems and live dashboards, have ensured **transparency, accountability, and credibility** of the largest national exercise of the census, facilitating informed decision making, Improving Governance for efficient management for policy planning and resource allocation

## Conclusion

In conclusion, the Digital Census-2023 has provided a comprehensive and accurate assessment of Pakistan's population, revealing a total of **241.59 million** individuals. This data-driven insight is invaluable for informed decision-making and policy formulation across a range of sectors. By utilizing appropriate headings, explanations, and structured content, this article aims to effectively communicate the significance of the population count obtained through the Digital Census-2023, ensuring its accessibility and visibility to a wide audience.
