## What is Human Development Index (HDI)?

The [Human Development Index \(HDI\)](#) was created to emphasize that people and their capabilities should be the ultimate criteria for assessing the development of a country, not economic growth alone. It is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.
