How to Solve Analogies/Related Pair of Words

Mcqs:

HOW TO SOLVE ANALOGIES: To answer Analogy question, start making up a “test sentence” that expresses how the two words in the question are related. Then try to insert the words from each choice in your test sentence to see which pair makes the most sense. To understand the concept better, consider the following example:

CRUMB: BREAD::

A. Candle: Light

B. Fire: Spark

C. Hillock: Mountain

D. splinter: Wood

E. Milk: Butter

First find the relationship between the given pair of words, and then look for the pair of words among the answers that has the same relationship.

A **CRUMB** is a very small piece that falls from or breaks off from a piece of BREAD. In choice (D), splinter is a very small piece that breaks off or splits away from a piece of wood. None of the relationships between the two words in the other choices is similar to the relationship between CRUMB and BREAD, for example.

1. Candle emits light; it is not a small piece of a candle.
2. Spark can cause fire. Fire is not a piece of spark.
3. Hillock and mountain has a relationship of small and large.
4. Milk is what butter is made from, but butter is not a small piece of Milk.

4. Eliminate the wrong choices so that you will have less choices to decide the correct answer.
