

How many Pakistani universities made it to the QS world subject rankings out of over 100 universities?

How many Pakistani universities made it to the QS world subject rankings out of over 100 universities?

- A. 5
- B. 8
- C. 10
- D. 12

Show Answer

Correct Answer: D (12)

Explanation:

The QS World University Rankings is an annual publication of university rankings by Quacquarelli Symonds, a British company specializing in education. The ranking evaluates universities based on a variety of factors, including academic reputation, employer reputation, faculty/student ratio, citations per faculty, international faculty ratio, and international student ratio.

As reported recently, only 12 Pakistani universities made it to the QS world subject rankings out of over 100 universities in Pakistan. This indicates that Pakistani universities are facing significant challenges in meeting the international standards of education and research.

The 12 Pakistani universities that made it to the QS world subject rankings include the National University of Sciences and Technology (NUST), Quaid-i-Azam University (QAU), Lahore University of Management Sciences (LUMS), University of Agriculture Faisalabad (UAF), and University of Punjab (PU), among others.

The low number of Pakistani universities in the QS world subject rankings highlights the need for significant improvements in the quality of education and research in Pakistan. It is important for the government and educational

How many Pakistani universities made it to the QS world subject rankings out of over 100 universities? institutions in Pakistan to take concrete steps to address the challenges facing Pakistani universities and to promote excellence in education and research.

So, the QS world subject rankings serve as an important benchmark for universities around the world, and they provide valuable insights into the quality of education and research being carried out in different countries. It is important for Pakistan to improve its performance in the rankings in order to compete with other countries in the global knowledge economy.
