

How much 60% of 50 is greater than 40% of 30?

How much 60% of 50 is greater than 40% of 30?

- A. 18
- B. 13
- C. 15
- D. 20

Show Answer...

Correct Answer: A.18

To find out how much 60% of 50 is greater than 40% of 30,

we first need to calculate the values of each expression:

$$60\% \text{ of } 50 \text{ is } (60/100)50 = 30$$

$$40\% \text{ of } 30 \text{ is } (40/100)30 = 12$$

Now that we have these values, we can compare them directly:

30 (60% of 50) is greater than 12 (40% of 30)

So, 60% of 50 is 18 greater than 40% of 30.

- Note:

If you want to check it yourself, you can also subtract 40% of 30 from 60% of 50 to find the difference.
