

How much of the global water supply is found in the ocean?

How much of the global water supply is found in the ocean?

- A. less than 28%
- B. about 75%
- C. about 87%
- D. about 97%

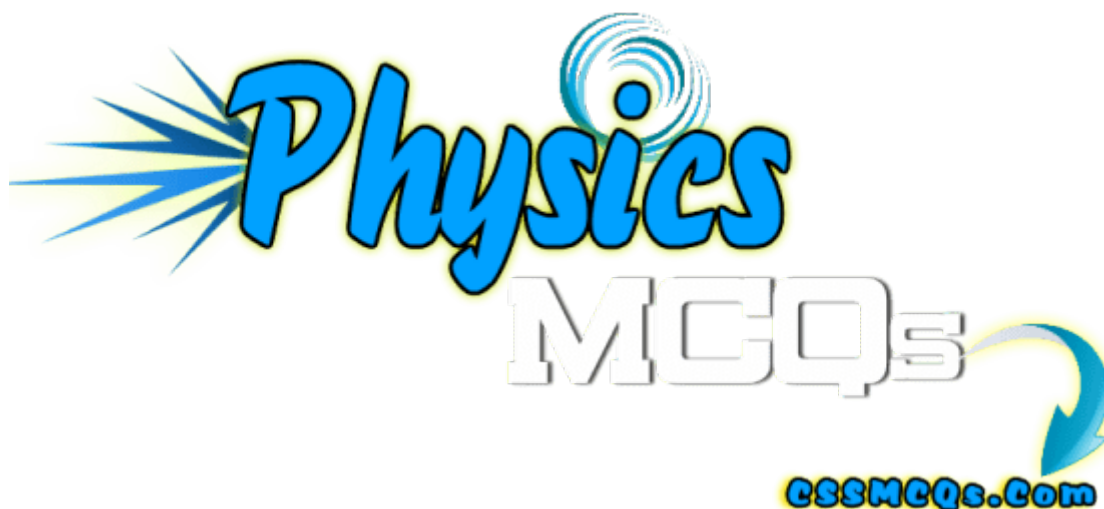

Show Answer...

Correct Answer: D. about 97%

Explanation:

Approximately 97% of the Earth's water is found in the ocean, making it the largest reservoir of water on the planet. The remaining 3% is freshwater, with almost 69% of it locked up in glaciers and ice caps, about 30% in groundwater, and less than 1% in lakes, rivers, and the atmosphere. The ocean plays a crucial role in regulating the Earth's climate and weather patterns, and supports a vast array of marine life.
