

How much per cent of tin and lead make a fuse wire?

- A. 63% tin and 37% lead
 - B. 63% lead and 37% tin
 - C. 63% tin and 37% aluminium
 - D. 63% lead and 37% aluminium
-

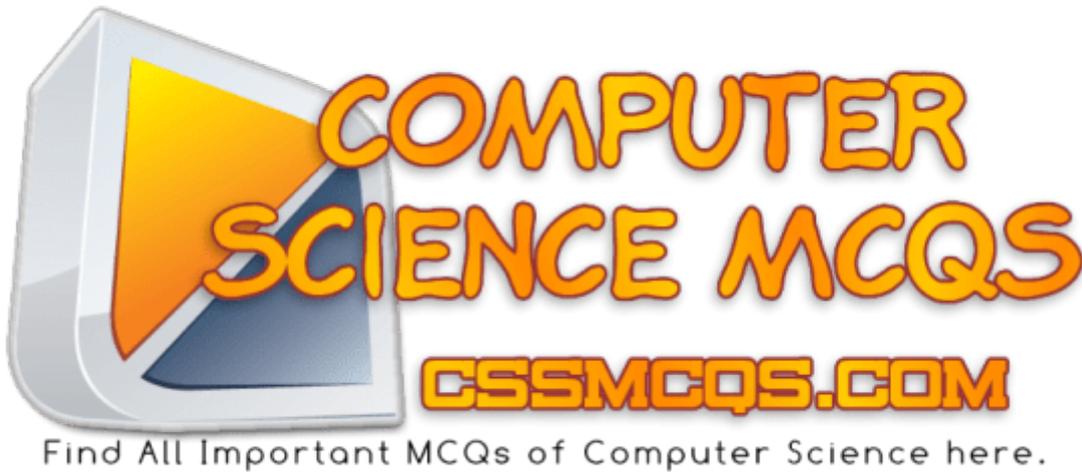

Fuse-wire Is made up of what?

A fuse is a piece of wire of a material with a very low melting point, that is, it melts and breaks as soon as its temperature gets higher than its melting point. The material used for making fuse have low melting points, hence fuse wires are mainly made up of tin, lead or zinc.

per cent of tin and lead make a fuse wire

Fuse-wire Is formed by tin-lead alloy (63% tin + 37% lead). It should have a low melting point and high resistivity. **Fuse-wire** is applied in series as a safety device in an electric circuit and is created so as to melt and thereby open the circuit if the current exceeds a decided value due to some fault.

[Computer MCQs:](#)

In this section, you will find Computer Fundamental MCQs, Computer MCQs, MS Office, MS Excel, MS Word, MCQ on Internet, MCQ Quiz KPPSc MCQs, [MCQ of Computer Science](#), NTS GAT, Computer has become a most demandable thing in any work. Almost all departments have computer need. And it every important to know the basic knowledge of computer. If you want to get a job or admission related to the computer, you must prepare online for computer science MCQ'S questions and answers.

Most of the test conductors like FPSC, NTS, KPPSC, PPSC and others, are adding computer knowledge MCQs in their test patron. Having a good command on the computer is very necessary. Here are some MCQs related to the Computer from basic to advance will help our readers to secure high marks in the computer portion of the test.
