If $72 \%$ of 25 students are interested in solving Maths Problems. How many are not interested in maths??

## If 72\% of 25 students are interested in solving Maths Problems. How many are not interested in maths??

A. 18
B. 7
C. 9
D. 16

## Solution

$72 \%$ x 25
$=72 / 100 \times 25$
$=72 / 4 \times 1$
$=18$
So $72 \%$ that is 18 people are interested in solving Maths Problems. However the $28 \%$ which comes out to be 7 people are not interested in maths solving problems. And this is our requires answer.

If $72 \%$ of 25 students are interested in solving Maths
Problems. How many are not interested in maths??
