

In America, the senators serve for how many years?

- A. Three
- B. Four
- C. Five
- D. Six

Show Answer...

Correct Answer: Six (6)

Number of Senators in USA

Each of the 50 states is equally represented by two senators who serve staggered **terms of six years**, for a total of 100 senators. The vice president of the United States serves as presiding officer and president of the Senate by virtue of that office, and has a vote only if the senators are equally divided. In the vice president's absence, the president pro tempore, who is traditionally the senior member of the party holding a majority of seats, presides over the Senate.
