## In America, the senators serve for how many years?

A. Three
B. Four
C. Five
D. Six

Show Answer...

## Correct Answer: Six (6)

\#\# Number of Senators in USA
Each of the 50 states is equally represented by two senators who serve staggered terms of six years, for a total of 100 senators. The vice president of the United States serves as presiding officer and president of the Senate by virtue of that office, and has a vote only if the senators are equally divided. In the vice president's absence, the president pro tempore, who is traditionally the senior member of the party holding a majority of seats, presides over the Senate.
