

Toad is the example of _____.

- A. Amphibian
- B. Mammal
- C. Reptile
- D. Bird

Show Answer...

Correct Answer: A (Amphibian)

Explanation:

Toad is an example of an amphibian. Amphibians are a class of cold-blooded vertebrates that live both on land and in water. They are known for their ability to breathe through their skin and their metamorphosis from a larval stage (tadpole) to an adult stage (toad). Toads belong to the family Bufonidae, which includes over 500 species of toads found all over the world.

Therefore, the correct answer is A (Amphibian).

In conclusion, toads are examples of amphibians, which are a class of cold-blooded vertebrates that can live on both land and in water.
