

UNIVAC stands for?

- A. Universal Automatic Computer
- B. United Nations Information and Computing
- C. Unified Network for Intelligent Computing
- D. Universal Network Interface Control

Show Answer...

Correct Answer: A (Universal Automatic Computer)

Explanation:

The correct expansion of UNIVAC is A, "Universal Automatic Computer."

UNIVAC was one of the earliest commercially produced computers, introduced in the 1950s. It was designed to handle both scientific and business applications and played a significant role in the development of computer technology.

Option B, "United Nations Information and Computing," is not the correct answer. While the United Nations may have been involved in computing advancements, it does not represent the expansion of UNIVAC.

Option C, "Unified Network for Intelligent Computing," is not the correct answer either. This phrase does not accurately describe the purpose or expansion of UNIVAC.

Option D, "Universal Network Interface Control," is also not the correct answer. This phrase is unrelated to the expansion of UNIVAC.

Understanding the origins and expansions of computing terms and acronyms helps to enhance knowledge of computer history and technological advancements.
