

What is 1000 less $\frac{5}{9}$ of 117?

What is 1000 less $\frac{5}{9}$ of 117?

- A. 700
- B. 935
- C. 870
- D. 845

Show Answer...

Correct Answer: B (935)

Explanation:

To find $\frac{5}{9}$ of 117, we can calculate:

$$\left(\frac{5}{9}\right) * 117 = 65$$

Now, we subtract 65 from 1000:

$$1000 - 65 = 935$$

Therefore, 1000 less $\frac{5}{9}$ of 117 is equal to 935.
