

What is the first phase of Mitosis?

- A. Prophase
- B. Metaphase
- C. Anaphase
- D. Telophase

Show Answer...

A. Prophase

Explanation:

The first phase of mitosis is prophase, in which the chromatin condenses into discrete chromosomes, the nuclear envelope breaks down, and spindle fibers begin to form at opposite poles of the cell. Metaphase is the second phase, anaphase is the third phase, and telophase is the final phase of mitosis.
