

What is the function of the transparent part of the eye that is located in the front of the eye?

# What is the function of the transparent part of the eye that is located in the front of the eye?

- A. To protect the eye
- B. To focus light onto the retina
- C. To control the amount of light entering the eye
- D. All of the above

Show Answer...

**Correct Answer: D. All of the above**

## Function Of The Transparent Part Of The Eye:

The transparent part of the eye located in the front of the eye is the cornea. Its main function is to help focus light entering the eye, by bending or refracting it, which helps to create a clear image on the retina. The cornea also helps to protect the eye from external damage and infection. The cornea, located in the front of the eye, protects the eye, helps to bend light as it enters the eye, and also helps to control the amount of light entering the eye.
