

What is the percentage increase from 5 to 7?

What is the percentage increase from 5 to 7?

- A. 20%
- B. 25%
- C. 40%
- D. 60%

Show Answer...

Correct Answer: C) 40%

Explanation:

To find the percentage increase, we can use the formula:

$(\text{new value} - \text{old value}) / \text{old value} \times 100$.

In this case, $(7 - 5) / 5 \times 100 = 0.4 \times 100 = 40\%$.

Therefore, the percentage increase from 5 to 7 is 40%.
