

What is the unit of measurement for sound intensity?

What is the unit of measurement for sound intensity?

A. Decibel (dB)

B. Hertz (Hz)

C. Watt (W)

D. Joule (J)

Show Answer...

Correct Answer: A) Decibel (dB)

Explanation:

Sound intensity is the amount of energy per unit area that sound waves carry. The unit of measurement for sound intensity is the decibel (dB), which is a logarithmic scale used to express the ratio of two power levels.
