

What type of number is zero?

A. Even

B. Whole

C. Rational

D. All of these

Show Answer...

Correct Answer: D (All of these)

Explanation:

Zero is a unique number that falls into multiple categories. Let's explore each option to understand why all of them are correct.

Option A, Even: Zero is an even number. An even number is any integer that is divisible by 2 without leaving a remainder. Since zero can be divided by 2 without any remainder, it is considered an even number.

Option B, Whole: Zero is a whole number. Whole numbers include all the natural numbers (positive integers) along with zero. So, zero is part of the set of whole numbers.

Option C, Rational: Zero is a rational number. A rational number is any number that can be expressed as a fraction where the numerator and denominator are both integers. Zero can be written as 0/1, which is a valid fraction and satisfies the definition of a rational number.

Therefore, the correct answer is D, All of these. Zero is an even number, a whole number, and a rational number.

Zero holds a significant place in mathematics and plays a crucial role in various mathematical operations and concepts. It serves as the additive identity, meaning that when you add zero to any number, the sum remains unchanged. It is also involved in multiplication properties and as an exponent base.

Understanding the properties and characteristics of zero is fundamental in mathematics, as it lays the foundation for more complex concepts and calculations. Zero's inclusion in multiple number categories highlights its

importance and its role as a cornerstone in mathematical reasoning and problemsolving.
