Pakistan's First locally produced electric

The first locally produced electric car was launched in Pakistan on August 14, 2022.

The first locally-produced electric car stemming from the collective efforts of Dice Foundation, universities and the private sector was launched in Karachi on Sunday.

The launch event was held on the country's Independence Day at a local hotel. The booking for the car named NUR-E 75 will be opened to the public in late 2024. Its battery pack was developed at the NED University of Engineering and Technology, and it is equipped with advanced features. The car is also likely to be exported.
